

The input/output (I/O) module provides the facility to monitor 3 independent inputs for fault and fire as well as providing the facility to operate 3 volt free contacts for operating devices such as magnetic door holders, in areas where the installation of system wiring is not an option.

The unit is fully monitored and controlled by Radio+ Control Panel. Both inputs and outputs are available from the same unit and may be operated.

- CONCEALED ANTENNAS
- 3 INPUTS
- DUPLEX TECHNOLOGY (2 WAY COMMUNICATION)
- 3 VOLT FREE OUTPUTS

Specification

Voltage	4.5V (3 x AA Lithium Batteries)
Battery Life	3 years +
Radio Frequency	868MHz
Radio Devices	28
Temperature	- 10°C to +55°C
Protection	IP21C
Construction	PC
Weight	0.9Kg
