

Radio+ Booster - Wireless Signal Booster

The Radio+ Booster allows devices outside the range of the Radio+ control panel to be addressed, monitored and controlled by the panel. Each Radio+ Booster operates its own dedicated wireless loop on a different system ID and frequency from the main control panel. Up to 8 boosters can be commissioned onto the Radio+ control panel.

- FULLY ADDRESSABLE
- CONCEALED ANTENNAS
- DUPLEX TECHNOLOGY (2 WAY COMMUNICATION)
- MAINS POWERED AND BATTERY BACKED
- UP TO 8 BOOSTERS PER CONTROL PANEL
- UP TO 28 RADIO+ DEVICES PER BOOSTER

Specification

Voltage	230Vac 50Hz (nom)
Batteries	12V 3.2Ah
Radio Frequency	868MHz
Radio Devices	28
Temperature	- 10°C to +55°C
Protection	IP21C
Weight	2.1Kg without batteries 3.5Kg with batteries
Material	Case - mild steel Fascia - PC/ABS
